RAIN & FLOODING

Property owners can help protect their homes and businesses by taking a few simple precautions during the rainy season:

- Clear debris from rain gutters
- Clear and clean all drains in yards, driveways and pool decks that could clog and cause backups into a home
- Clear and place sandbags in problem areas if the area has been affected by a wildfire or if there have been flooding problems in the past

If Flooding Occurs

- Use extreme caution when crossing roads or areas of flowing water. It is very difficult to determine the depth of flowing water and it may be dangerously deep.
- Do not use storm or runoff channels for recreation. They are deceptively dangerous and rescue is extremely difficult since these channels are designed to move vast quantities of water very quickly.

Many Ventura County Fire Protection District Fire Stations have sandbags for emergency use only. To best prepare, you should visit local retailers that sell sand and sandbags and take steps to protect your property prior to a potentially destructive rainfall.

Sand and Sandbags

Sand and sandbags may be purchased from the following retailers. Prices and availability may vary. Other retailers may be available in your area.
